Red Trail Items

Quite a number of the Seven Day Adventists left for Calgary on Tuesday, where they attended the dedication of their church on Riverside.

Joe B. Fleck and wife of Beiseker, are visiting their mother and brother.

Ben Dick had an operation on his skull last week and is slowly improving.

J. D. Fleck spent a few days in Calgary last week getting his teeth fixed.

A new Willis piano was recently installed in the Adventist church.

Mr. and Mrs. Henry Kary and Mr. and Mrs. Ed. Zeigman, the newly weds, spent last week taking in the sights of Calgary.

James Heidebricht, aged 10 died in the Calgary General Hospital on Sunday, Jan 16. Funeral services were held at the Adventist church on Wed., Jan. 19.

Mr. and Mrs. Ed. Siegmund are visiting at the home of Carl Schulers.

A birthday party took place on Wednesday night at the home of Mr. and Mrs. Jacob Buyer in honor of their son Andrew. The party was attended by young and old and all had a most enjoyable evening.

Mr. and Mrs. Sam Ohlhauser and son, and Miss Lydia Bertsch returned Friday after a two month visit in N. Dakota. We also expect to see Jack Bertsch Jr. back soon with his wife.

Skating is in full swing out in the country.

After a two week's sickness at her home, Mrs. Fred Ohlhauser was taken to the Calgary hospital.

Mr. and Mrs. Jacob Buyer and Mrs. G. Schell are visiting with relatives in Calgary this week.

Mr. Reuben Schatz of Trochu, was visiting with friends in Carbon on Sunday.

A surprise party took place on Monday evening, at the home of Mr. John Neher, in honor of the Mocher school teacher, Miss Martha Kujath.

Turkish tobacco, grown in Alberta, is better than that grown in Turkey or Greece, according to a Mr. Baker here, who grew 1,000 pounds as an experiment this season. He plotted out three-quarters of an acre to ten varieties of tobacco seed. The crop was harvested ripe before the coming of frost, and of the ten varieties Turkish, White Barley and Orinoco thrived best.

Nearly 1,050 overseas vessels entered the Harbor of Montreal and over 350 coastal vessels docked there in the season just closed. This makes a very favorable showing compared with the 1,255 overseas and 215 coastal vessels of the previous season. During the period of open navigation over 113,850,000 bushels of grain were shipped from the port and flour shipments totalled 2,090,000 barrels.

Canada scored again at the Chicago Exposition when the blue ribbon grand championship in the Clydesdale stallion division went to Forest Favorite, owned by Haggerty and Black of Belle Plaine, Saskatchewan. Last year the University of Saskatchewan took the coveted honor with Green Meadow Footsteps. This year, it is said, the veteran Canadian stallion was an easy winner over all others.

G. Williams, G. Jealous, B. Black, W. Dixon, B. McQuade, S. Malton.

Gouin-Charlebois

St. Gabriel's church, Carbon, was the scene of a very pretty wedding on Wed., Jan. 19, at 10:30 a.m., when Miss Albina Leonie Charlebois, daughter of Mr. and Mrs. D. E. Charlebois, became the bride of Mr. Alphonse Gouin, of Rosebud. Miss Olive Charlebois, sister of the bride, was bridesmaid, and Mr. Wilfred Greenier assisted the groom. The bride looked charming in a dress of pink crepe de chene with orange blossoms and veil, carrying a lovely bouquet of roses. The bridesmaid wore a dress of lavender satin and carried a bouquet of sweat peas. Mrs. Barr, of Carbon, presided at the organ. After the ceremony a wedding breakfast was served at the home of the bride's parents, only relatives and immediate friends being present. The table looked very pretty, centred with the bride cake, the color scheme being carried out in pale pink and white. Miss Clare Linay and Mr. Eugene Charlebois waited on the table.

The bride was the recipient of many beautiful gifts, among which was a lovely assortment of china. After a short honeymoon in Edmonton the happy couple will reside in Rosebud.

After a short honeymoon in Edmonton the happy couple will reside in Rosebud.

FOR SALE

Quantity of household furniture, including: Kitchen range, heater, kitchen cabinet, kitchen table, glass wall cupboard, bath tub with hose, washing machine & wringer, Winnipeg couch, coal-oil stove and oven, refrigerator, 2 barrels, coal-oil lamps, 3 wicker chairs, dining-room suite, 2 bed room suites, and numerous other articles. Phone 33, Mrs. G. L. Brown.

Immigration to Canada for the first nine months of the calendar year 1926 shows an increase of 66 per cent over the same period a year ago according to a statement issued recently by the Department of Immigration and Colonization.

Moncton, New Brunswick.—Frozen blueberries are now being shipped in quantity to Cleveland and other centres in the United States. So far eight carloads have left Moncton, iced so that the fruit will remain frozen. Two more carloads are about to go forward.

Victoria, British Columbia.—Famous Players-Lasky are to establish a plant in British Columbia for film production, it was announced in connection with the \$15,000,000 concern known as the Famous Players' Canadian Corporation, Limited, of Toronto.

Traffic in grain from Winnipeg along the Canadian Pacific Railway lines this year has been heavier than last year by over 12,000,000 bushels. With 110,298,085 bushels marketed and 63,010 cars loaded the increases over last year's ten month period were 12,188,437 bushels and 3,538 cars.

Gamble Items

Mr. T. White has purchased the 'Webster' half section from John Clayton.

S. N. Wright and Geo. Webber went to Edmonton this week on municipal business. L. B. Hart is also there attending the U. F. A. convention.

Mrs. Dawson, who has been visiting her daughter in Edmonton, has returned to her home again.

Mrs. C. M. Stenberg returned last Friday from Cranbrook, B. C. Robt. Thompson enjoyed a brief holiday in Edmonton.

Carl Jennings and Jack Gibson made a trip to the coast looking for employment, but without success.

PARK FUND DANCE IS WELL PATRONIZED

A fine crowd, real snappy music, and splendid refreshments went to make up the hillarious time had by all those attending the dance in the Farmer's Exchange Hall last Thursday evening. The proceeds are to go to repairing the dam in the creek so as to be in readiness for the spring floods.

There will be three more of these monthly dances, as well as a minstrel show, and judging from Thursday's event, the committee in charge should have no trouble in gathering large crowds on these occasions.

A number of young people gathered at the home of R. Brost last Thursday evening where a skating party was formed. After a couple of hours on the ice, the crowd returned to the house where refreshments were served. The young people appreciated the kindness of Mr. and Mrs. Brost for the use of their home.

International Ignorance

Ignorance and misunderstanding among the nations cause more trouble than the machinations of political leaders, who are blamed for so many of the world's ills. Democratic government, says a Japanese former minister of education, has reached such a state that the few well-informed men of international outlook in any country are overshadowed by the weight of passion, prejudice, and the unreasoning fear and ignorance of the masses. He ascribes the present mischiefs of the world, in nine cases out of ten, to international ignorance and stupidity, and the same cause he assigns as the chief reason for the strained relations which have existed in recent years between the United States and Japan.

This Japanese statesman holds that the greatest need to the development of a better understanding between these two countries is more publicity, the printing by the papers of both countries of more news, more sympathetic news, of happenings in the other country, and a sympathetic interpretation of it. He advocates cheaper radio and cable tolls which, he states, would be an inestimable aid in bringing about the consummation of this campaign of education against the great and always present danger of national ignorance.

Undoubtedly one of the reasons for the sympathetic and good relations existing between the United States and Canada is that we understand each other, an understanding brought about by a common language, the free exchange of news-papers and periodicals of all kinds, free intercourse across the border by mail, telegraph, telephone, radio, automobile and train. While retaining separate nationalities and quite different national ideals, and with no thought of political union, there nevertheless exists the closest ties of friendship and understanding so that the mere thought of war is abhorrent and impossible.

The secret is that we understand each other, and that understanding is the outcome of knowledge of each other. Each country is able to see the other's viewpoint. If, instead of this knowledge, the two great groups of people dividing the North American continent between them were steeped in ignorance of each other, there would be constant friction.

One of the sources of strength possessed by the British Empire is the knowledge which each component part has of the other parts. Statesmen have always recognized the importance of the rapid and continuous dissemination of information throughout the Empire and every encouragement has been given to the provision of inter-Empire means of communication by cables, steamship lines, Imperial penny-postage, and in these later years by the development of aerial communication. Not the least of the advantages of the periodical Imperial Conference is the discussion and understanding of Empire problems which result and from which understanding comes.

So, too, in the annual gatherings of the League of Nations Assembly, and the frequent meetings of the Council of the League and its many committees, is to be found one of the greatest of all preventatives of future wars. These meetings bring about mutual understanding and dissipate ignorance and prejudices. Only recently one of the outstanding figures in the public life of Germany of today declared that had there existed the same machinery for consultation between the nations prior to 1914 as is now provided by the League of Nations, the Great War would never have been fought.

The need of the whole world is greater knowledge--that is greater international knowledge. Fortunately, the trend of modern inventions is to facilitate the dissemination of such knowledge and to promote world travel and international intercourse.

Departing for a moment from the international aspect of this fundamental question of knowledge versus ignorance, it will readily be appreciated that the same truth has equal force when applied to Canada itself. Any weakness in our national position today is to be found in a lack of complete understanding between the different parts of the Dominion, in the fact that Maritime Province conditions are not as fully understood and appreciated in Ontario and the West as they ought to be, and because in Ontario and down by the Atlantic seaboard it is difficult for them to visualize and grasp our Western problems.

In the development of that much to be desired knowledge of each other every possible agency should be employed--through the press, by means of national conventions, encouragement of tourist traffic within the Dominion, in which good roads, railways and even airplanes will play their part. The replacing of ignorance by knowledge will do more than anything else to create a strong and united Confederation, just as certainly as it will remove causes of international misunderstandings and friction which lead to war.

Always Doubtful Liability

Reuter--"Nigger, ah shoo does be have a ghost of a chance to escape into court. Purchasers of bank shares do so with their eyes open. If anything happens to the bank, they are liable for twice the amount of their shares. However, most people would take that chance on the stock of the Canadian chartered banks of today."

Reuter--"Nigger, ah shoo does be have a ghost of a chance to escape into court. Purchasers of bank shares do so with their eyes open. If anything happens to the bank, they are liable for twice the amount of their shares. However, most people would take that chance on the stock of the Canadian chartered banks of today."

Brown--"Nigger, ah believes in evolution, too; an' nigger, you looks like you ain't 'volved yet."

Forests once covered 822 million acres in the United States. About 25 per cent of this area has been reduced.

A woman is always contrary enough to agree with a man when he doesn't want her to.

Children Cry for

Fletcher's CASTORIA

MOTHER--Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *F.H. Fletcher*. Printed directions on each package. Physicians everywhere recommend it.

Huge Amount Left
By Auto Tourists

Canada Reaped \$194,000,000 During First Ten Months of Last Year

Automobile tourists from the United States entering Canada during 1926, left a gross revenue to the people of the Dominion of about \$194,000,000, according to a careful estimate made by A. W. Campbell, Dominion Commissioner of Highways. In 1925 the estimated gross revenue from this tourist traffic was \$188,555,100. The latter figure, however, was for the twelve months, while the figures on last year's business was not complete, and only for the ten months ending with October, so that the increase for the entire calendar year of 1926 will show an even larger advance over 1925.

From Jan. 1 to Oct. 31, 1926, the numbers of United States cars entering Canada at Customs ports of entry for touring purposes were as follows: Under the twenty-four hour period, 4,563,105; estimated gross revenue from these, \$27,262,180. Thirty-day period, 530,742 cars; revenue, \$159,222,600. Six-month period, 4,193 cars; revenue, \$7,925,100.

An indication of the extent of the incoming United States automobile tourist traffic is furnished in 1925 year's totals at the principal entry places: Into British Columbia, over the Los Angeles-Vancouver Highway, 76,000 cars; Lord Selkirk Highway, at Emerson, Twin Cities to Winnipeg, 6,000 cars; Soo, 6,000 cars; Sarnia Port and Port Huron, 50,000 cars; Detroit, 90,000 cars; Niagara Falls and Bridgeburg, 820,000 cars; Kingston, Prescott and Brockville, about 13,000; St. Lawrence River or Quebec Province, about 460,000 many of which were for the one-day period, as only a narrow river intervenes.

The explanation offered as to the large number of cars entering at the Niagara border compared with the small number at Quebec points is that there are many sightseers at Niagara Falls and many commercial transactions between United States and Canadian towns and cities there.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short-lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Uses American Slang

American slang has become a part of everyday speech of Anton Lang, the "Christus" of the Passion Play at Oberammergau, said Prof. C. H. Conley of Wesleyan University. The professor visited Lang while in Germany last summer and noticed that while he spoke excellent English he frequently used with evident delight many colloquial phrases which he had garnered while in this country.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With no sterner remedy at hand no child should suffer an hour from worms.

Holds "Great War" Sale

Britain Disposing of Leftover Properties Worth Millions

England will finish one of the biggest jobs of salesmanship ever undertaken by a single government when \$3,100,000,000 worth of property from practically every former fighting front of Europe will be disposed of about March 1st.

Lands, buildings, factories, railway materials, foodstuffs, horses, barges, medical supplies, and a host of other items are included in the list of properties left on the hands of the government at the close of the war.

The commission in charge of selling began its work in 1919 with a staff of 17,000 men. Five are handling the final phases of the job.

A letter of a former day would thus describe his bairns: "She's quiet and bairn as a mouse, and wonderful about the house." Whereas, sheik would say right now, "I'll tell the world my gal's a wow. A classy bairn, just fulla pep. Yuh ought ta see that baby step."

Letter Was Delivered

A remarkable incident has been reported--the case of a child at Houston, Texas, who addressed a letter to Santa Claus in Northland, Canada, and the epistle through the efficiency of the American and Canadian postal employees, reached Northland on the A.C.R., 24 miles north of the Soo.

Twenty-two pounds of sugar can be made from a bushel of corn by a new process used by the Department of Agriculture.

"As a man thinketh, so he is," chanted the minister.

"I don't know about that," replied the machinist, "many a man thinks he is the berries when he is really nothing but a nut."

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Bamboo is the latest material for making paper. Bamboo, long regarded as a weed in India, has become an important commercial product.

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100--Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Extracting Chemical Compounds From Coal More Valuable Than Heat From Combustion

Scientists are predicting that within a generation a new coal age will replace that prevailing for the last six centuries when men have known nothing better than to burn coal as it came out of the mine. Experts of various countries who attended the recent international conference on bituminous coal held at Pittsburgh agreed on this, and their conclusions open another chapter in the thrilling romance of achievement. Chemists, mining engineers and fuel experts all saw the world on the threshold of a new era in fuel realization when it will be deemed a criminal waste to burn raw coal as fuel instead of extracting the chemical compounds that are far more valuable than the heat produced by combustion.

The conclusions of the world's coal experts open a new wonderland of science which, from a commercial point of view, will surpass the marvels of radio communication. They prefer to man relief for centuries from the problem of motor fuel, with a product superior to gasoline and far cheaper. Their scientific dreams, which must be translated into commercial fact, will eliminate the tremendous waste in burning the raw coal, the huge cost of transportation, the evil of the incombustible by products and the mounting cost of coal delivered in the bin. This modern wonder will be accomplished, it is predicted, by a process of pulverizing coal to the consistency of talcum powder so that it becomes a fluid when heated and runs like water. Then will come the use of the new coal oil instead of gasoline in internal combustion engines. That this is not limited to a prophetic future is evident from the announcement that before long automobile engines will be testing the new fuel. France already has experimented extensively with alcohol derived from coal.

With coal treated as a liquid instead of a solid, the coal industry and technique must undergo a complete change, according to the scientists, who declare that the mining of coal, transportation, burning, carbonization and gasification will be affected. It should follow that the nation no longer will be compelled to pay an excess tax cover the cost of production at the poorer mines under existing conditions. The rosy outlook was summed up in the following terms:

"Because coal can be purified, because it can be pulverized to minute sizes, because it can be distilled at high thermal efficiencies to produce oil, gas and carbonized powder, because it can be made to flow and to pump, because it represents the most efficient methods for the creation of mechanical energy, the world may look forward with confidence to a new era of coal, greater and more permanent."

The iron age has been supplanted by that of oil, which will continue indefinitely. The source of that oil may later be a cause of world concern, however, as the liquid fuel is derived from the known fields. But the magicians of science are preparing to wave their wands over the tremendous coal deposits and assure to man a fuel supply for the coming centuries.

An Unusual Experiment

Professor is Testing Sleeping Brain For Learning Power

A University of Minnesota psychologist is seeking to determine whether learning can be acquired in sleep.

Prof. W. T. Heron is conducting the experiment on himself. He has rigged up a telephone with an electrically driven phonograph so that sounds are conveyed to his ears by headphones. The contrivance is so arranged that when he releases his grip on an automatic switch, as he falls asleep, the phonograph starts operating softly.

"Whenever I awaken, the renewal of the grip on the switch will immediately stop the machine," he said. "In this way I will be sure that I will not hear the material in the waking state."

"It does not seem to be beyond the realm of possibility that the human being may learn, at least to some extent, while asleep."

Color Photography

May Be Useful in Throwing Some Light on Conditions on Mars

Color photography may throw some light on conditions on Mars.

Whether Mars has an atmosphere, with its important bearing on the possibility of life on the planet, long a scientific question, may be settled by experiments with color photography. In an article written for the Astrophysical Journal, Prof. F. E. Ross, of the University of Chicago, a member of the staff at Yerkes Observatory at Williams Bay, Wis., says that "pictures taken by the use of colored lights, notably the long infra-reds, penetrate the atmosphere surrounding the planet and produce a much better picture than when ordinary light is used."

Constant communication with ships at sea, advising them of newly sighted derelicts, rafts and other things is maintained. The bureau supplies all navigators with information and asks their reciprocation by advising of the longitude and latitude of icebergs and other stragglings. It immediately disseminates the news over all ocean highways.

Meanwhile the navy and coast-guard amphibious squadrons are notified and patrols sent to visit the scenes of drifters and remove them.

New and Attractive

The dolman sleeve gathered into a cuff is decidedly of the latest mode in this smart one-piece dress. The skirt has an inverted plait in each side seam, thereby allowing for the necessary fullness. The collar may be worn high or low. Buttons adorn the neck at collar opening, and on sleeve cuffs. No. 1451 is for ladies and misses and is in sizes 16, 18 years, 36, 38, and 40 inches bust. Size 36 requires 4 1/4 yards 39-inch material or 3 1/4 yards 54-inch, 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

Time to Get Busy

There is a lot of truth in the statement that the psychological time for a country to launch an aggressive colonization campaign is when her agriculture has definitely entered the upward swing. It looks as though Canada had better get busy.

Character is the inside decoration of man; reputation is the whitewash on the outside.

Menaces To Navigation

Maritime Patrol Keeps Ocean Lanes Free From Obstructions

While seas quietly lap the shores of the world, a vigilant maritime patrol, unknown to most "landlubbers," busily stalks the silent but treacherous foes to commercial shipping.

Icebergs, floating debris, land abutments, drifting buoys, derelicts and opaque fogs are constant menaces to navigation against which war must be waged. The nerve centre of operations the world over is the Hydrographic office of the navy department. This bureau tries first of all to keep a finger on the whereabouts of all dangers to shipping about which it is imperative, in safety's cause, to know. An elaborate intelligence service, enlisting cooperation of hydrographic services of other countries, assists the bureau to chart known impediments to water traffic, and send out warnings.

Constant communication with ships at sea, advising them of newly sighted derelicts, rafts and other things is maintained. The bureau supplies all navigators with information and asks their reciprocation by advising of the longitude and latitude of icebergs and other stragglings. It immediately disseminates the news over all ocean highways.

Meanwhile the navy and coast-guard amphibious squadrons are notified and patrols sent to visit the scenes of drifters and remove them.

New Ferryboat Revolves

Has Been Developed to Dodge London Water Traffic

A ferryboat which does everything except toot its own whistle has appeared at the Royal Albert docks. It does more than any ferryboat has ever done before, and does it all without either rudders or propellers.

It goes forward and backward with equal speed and ease. It spins on its own axis like a top. It sidesteps with the same facility.

The power plant consists of a powerful pump. Under the hull are four large pipes, two lengthwise with the keel and two at right angles. The pilot can turn the stream of water from the pump out through any of the large pipes which he chooses, and the rush of water from the pipe drives the ferryboat forward or back, or sideways in any direction. By using two pipes, the boat can be made to revolve without moving ahead.

Lands Plane on Mountain

To demonstrate that it is possible for aeroplanes to land on small spaces, John Leeming, of the Lancashire Aero Club, alighted on the summit of a mountain near Windermere, Eng. His landing was made on a small summit area 300 feet by 20 feet on Mount Helvellyn, rising to a height of 3,118 feet, in the English lake district.

The more experience a man has in making resolutions the poorer the quality he turns out.

It takes a woman who doesn't know how to do a thing to do it better than a man who knows all about it.

Canadian Wool For Britain

The last steamer to clear from Montreal before the close of navigation for the present season, carried a shipment of 70,000 pounds of graded wool from the Canadian Co-operative Wool Growers to Liverpool. This was the largest shipment of wool from this country to England in 1926.

Some people waste a lot of energy climbing mountains before they are even in sight.

A girl suppresses the crying habit when it begins to make her nose red.

Quartette of Champions

The sporting eyes of the continent were turned towards the Canadian Pacific's new golf course, Langara, at South Vancouver recently, when Walter Hagen, golfing ace, went into action in an attempt to break the par figures of this outstanding course. He fell a little short of this accomplishment but the event was outstanding in the sports history of the Pacific coast and drew many notable

witnesses from other fields of sport fame. Babe Ruth, the king of the baseball world; Suzanne Lenglen and Vincent Richards of tennis fame, were interested spectators. The above photograph was taken on the roof garden of the Hotel Vancouver where these celebrities were guests, and shows from left to right: Vincent Richards, Babe Ruth, Suzanne Lenglen and Walter Hagen.

Canadian Cattle Greatly Favored For Many Excellent Qualities By Buyers On British Market

Live cattle from Canada that have come to the British markets during the past few years have created more than average interest among buyers.

"It is chiefly because, in addition to the fairly good type, conformation, and condition of flesh, they possess a remarkably good record of health," states W. A. Wilson, agricultural products representative for Canada. "Post-mortem seldom reveal even a trace of disease, and in this respect our cattle are practically in a class by themselves.

It means that no offal is condemned by local health authorities, and the butchers' profit is not, therefore, interfered with. The trade in these by-products is important, and when butchers can figure on getting cattle that have sound livers, etc., that can be sold at a profit, naturally they want to buy them, and the Canadian sales rings offer the opportunity."

The farmers who buy feeders have also heard of the advantage of vigor and health in Canadian cattle, says Mr. Wilson. A healthy and good foundation for immediate gains in weight, appeals to them, because it means rapid turnover and profit on their investments. It also reduces the risks of having one or more animals that do not show gains in weight. If the percentage of this class of bullock is high, heavy losses may follow, consequently the buyer tries to select as carefully as possible in order to escape this risk, and not a few learned how well the Canadian cattle meet the situation.

"We do not occupy quite the same enviable position with regard to the type and conformation of our cattle in comparison with some others, but at the same time they compare well with many cattle," says Mr. Wilson. "That, however, offers little, if any, justification for having only an average or medium standard for type and conformation to our credit. There is a good deal of variety evident in our shipments, and the comparatively small percentage of undesirables discounts both the sale price of the lot and the reputation of the Canadian bullock as a whole. The importance of a national reputation for any commodity can scarcely be over-emphasized, and if we could bring the quality of all our export cattle up to the standard of the best 25 per cent now shipped the average value would be noticeably greater and our reputation noticeably better."

Not all buyers are enthusiastic about Canadian cattle because there are dealers, butchers and feeders who have interests, direct and indirect, elsewhere. They are out to safeguard these interests, and the arrival of a few undesirable bullocks offers the opportunity for an effort to discredit the lot. In Mr. Wilson's opinion, the most effective way to avoid criticism is to select carefully the cattle for stall-feeding or pasturing in Canada, and with a similar selection of store cattle, the basis of the criticism can be wholly removed.

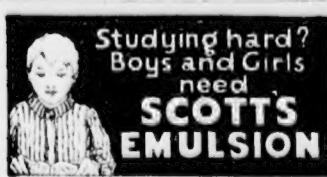

Had Branches of Gold

Costly Christmas Tree for Family of Klondyke Millionaire

Perhaps the most remarkable and certainly the most costly Christmas tree ever provided was that which graced the apartment of a Klondyke millionaire at a New York hotel. Its every branch was loaded with gold nuggets, and around the trunk was planted a large pile of \$20 gold pieces. Altogether the value of this tree was between \$60,000 and \$65,000. He was a young man who had just returned from the Klondyke, and provided this unique Christmas tree for the amusement of his wife and children. Before going to the Klondyke he was a poor brakeman on the Southern Pacific railway.

Qualities that make a man feel superior are usually ones that cause his acquaintances to rate him as inferior.

In Tibet it is the custom of natives when meeting friends to stick out their tongues as a mark of respect.

WORLD HAPPENINGS
BRIEFLY TOLD

As a measure of economy the man power of the Belgian army is to be reduced from 77,000 under arms to 62,000, or twenty per cent.

Jabe Mason, 91, died in Toronto, recently. He was the oldest twin living in Canada, his twin sister having predeceased him in April last.

It is being whispered about that King George within the last year or so has practically become a teetotaler. Hot milk is said to be his favorite drink when he is alone or in the circle of his family.

Nearly one and one-half million dollars will be spent by the Japanese Government for the funeral of Emperor Yoshihito, who died December 25. The funeral will take place late in February.

The Verwood Oil Co., with a capital stock of \$200,000 divided into shares of \$1 each has applied for and received incorporation from the Dominion Government. The headquarters of the company is at Verwood, Saskatchewan.

Farmers residing within a few miles of Prince Rupert, B.C., have become members of the Alberta Wheat Pool and have signed contracts to ship their grain through the pool. A sample of wheat sent from that district graded No. 1 Northern.

Canada's employment index number stood at 101.1 on December 1 last, as compared with 102.8 in the preceding month, and 95.3 on December 1, 1925. Despite the seasonal curtailing registered on the first of the month, however, employment continued at a higher level than in any month of the years 1921-1925.

Osborne College, Isle of Wight, is to become a training centre for emigrants for the Dominions, under the joint auspices of the Y.M.C.A. migration department and the Church of England council for empire settlement. It is hoped to give a preparatory training to 2,000 men and boys yearly for life in the Dominions.

HAD BAD SPELLS
WITH HER HEART

Mrs. R. G. Hall, Bolton Centre, Que., writes: "Some time ago I had bad spells with my heart which I believe was caused by nervousness. I tried everything I could think of, but could get no relief until one of my friends persuaded me to get a box of

After I had taken a few boxes I got wonderful relief.

I now weigh one hundred and thirty-five pounds where, before, I never went over ninety."

Price 50c, a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The average level of the cost of living in Great Britain on the first of October, 1926, was 71 per cent, above that of July, 1914.

Many mothers have reason to bless Mother Graves' Warm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Cranks: "How did you cure your wife of her antique craze?"

Shair: "Oh, I just gave her a 1907 model automobile for her birthday."

When a man gets to the point where he is too lazy to look without a salary his friends get him a political job.

John Bunyan's First Book

Story for Boys and Girls Now In Harvard Library

A forty-four page edition of John Bunyan's "A Book for Boys and Girls," of which there is only one other known copy in the world, has been presented anonymously to the Harvard Library. It has been announced by George P. Winship, in charge of the treasure room. The book was discovered by Miss Miller, a postal employee in Hennel, Hampstead, England, and was auctioned off to a London book dealer for \$10,350. The book, which was published in 1688, is being given in memory of Lionel De Jersey, Harvard '15, who was killed in action in France during the Great War.

For Aches, Pains,
The Safe Home Remedy
NERVILINE

When sudden sickness comes, when the kiddies come in with colds, the little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Cramps, Colic, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline"—35 cents at all dealers.

School Smartness for the Young Girl

The frock illustrated gives you an idea how smart a school frock can be when made from flannel, with just the right touch of contrasting color used for collar, cuffs and belt. There is an inverted plait at each side of the skirt front, and the back is plain. The narrow belt fastens with a button at each plait, while the long sleeves are gathered to cuff bands. No. 1397 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 1/4 yards 36-inch material, and 1/4 yard contrasting. 20 cents.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

DOGS

New Discovery Is Important

X-Ray Films Reveal Processes of Human Body

A method of taking X-ray films of the processes of the human body has been discovered by three British scientists; it was declared. The problem, which has long baffled American and European scientists, has been solved by Frederick Melville, radiologist at the University College of London, and E. E. Warnford and E. W. Edwards of the British Instructional Films Company.

As a result of this new invention the public soon will be able to see films showing the beating of the heart, the respiratory movements of the lungs and the various stages of the digestion of food.

The method is said to be precisely the same as when ordinary motion pictures are taken, except that X-ray is used. The scientists, however, do not disclose the secret of the method, by which, as the sequel of two years' experimentation, they have overcome the difficulty of obtaining sufficient illumination without injuring the skin of the subject.

The discovery is declared to be of the greatest importance from a medical viewpoint both for teaching and research. Physiologists will be able to obtain exact information about many processes which thus far have been judged only by inferences.

REGAINED HEALTH
IS NOW HAPPY

The Experience of a Quebec Woman With Dr. Williams'

Pink Pills

Mrs. L. D. Bernier, 89 D'Arguillou street Quebec, is one of the thousands of women who, when she found her health failing, resorted at once to Dr. Williams' Pink Pills, and now finds herself in perfect health. Mrs. Bernier says:—"I was very weak, subject to headaches and was unable to sleep well. Testimonials in the newspapers persuaded me to try Dr. Williams' Pink Pills, and the result has been most satisfactory. I have regained my health, the headaches have left me; I sleep well at night, and I have gained in weight. Naturally I am feeling happy. I strongly recommend Dr. Williams' Pink Pills to all weak people."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate resistance that will keep you well and strong. If you will send us your name and address a little book, "Building Up the Blood," will be mailed you prepaid. This little book contains many useful health hints.

You can get these pills through any dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Magistrate—"You say he sold you had the face and hands of a monkey, and that he could make a better man than you out of chewed string? What happened then?"

Victim—"He then became abusive."

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

Mr. Nouveau (explaining his new radio set): "Y' see, the waves ain't sound waves or electric waves—they're ether."

Mrs. Nouveau (correcting him): "Eyther, George."

Frostbites.

Ease the pain with Minard's Counteracts Inflammation, soothes and heals.

Minard's Liniment for chapped hands.

SUNDAY SCHOOL LESSON

JANUARY 9

THE STANDARD OF CHRISTIAN LIVING

Golden Text: Ye therefore shall be perfect as your heavenly Father is perfect.—Matthew 5:48.

Lesson: Luke 6:27-28.

Devotional Reading: Matthew 5:1-10.

Explanations and Comments

1. The Law of Love, verses 27-31. See Matthew 5:39-41; 7:12; 5:42-48.—"But I say unto you love your enemies." Be ruled by love in your treatment of them. At the same time when Jesus uttered these words, revenge wreaked upon an enemy was considered noble. Recall how Cicero gloated over the misfortunes of his enemy; he thought himself fortunate on his deathbed that he could say no one had done more good to his friends nor more mischief to his enemies.

"The Greek word for love in our text is carefully chosen. It is not demanded that we should love our enemies with a natural and spontaneous affection (philien), but with a supernatural Christian love that comes by grace (agapian)." Expositor's Greek Testament.

We all agree with Frands de Sales who says: "It is easy enough to love those who are agreeable and obliging—what fly is not attracted by sugar and honey?" But to love one who is cross, perverse, tiresome, is as unpleasant a process as chewing pills."

Nevertheless, this is the real touch stone of brotherly love. The way to practice it is to put ourselves in thought in the place of the one who tries us or mistreats us, and to see how we would wish him to treat us if we had his defects and misunderstandings.

We should love our enemies, but Dr. Shailer Matthews is right in saying that love for our enemies is not moral if it deadens our indignation against the crimes they perpetrate.

Good Reasons For Advertising

Southern Newspaper Gives Eight That Should be Convincing

An enumeration of the reasons for advertising has recently been given out, says the Kingston Whig-Standard. There are eight reasons advanced, but there are many others, of course. However, here are eight that are very splendid and highly convincing, as given in a southern newspaper:

Newspaper reading is a universal daily habit; newspaper, therefore, reaches each day virtually all who buy.

Newspaper advertising is the life blood of local trade because it touches all consumer sources in every community. It gives the national advertiser the same opportunity for complete consumer appeal in any locality.

Newspaper advertising cuts selling costs because it entails no waste in locality of circulation. Manufacturers use it to cover markets where it is profitable to do business.

Newspaper advertising insures quick, thorough and economical dealer distribution and dealer goodwill, because retailers are willing to sell products advertised direct to their own consumers.

Newspaper advertising enables manufacturers to tell where their products may be bought.

Newspaper advertising can be started or stopped over night, can be prepared between days to meet certain developments and to obtain immediate results.

Newspaper advertising enables manufacturers to check advertising which they enter.

Newspaper advertising costs less than any other kind.

The merchant or other business man who takes advantage of the opportunities offered by newspaper advertising to boost his business during the Christmas season will be able to face the quiet months of January and February without undue worry.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

For Frostbites.—The maid has just given notice; she said that you spoke insultingly to her over the telephone, yesterday."

Husband—"Great Scott! I thought I was speaking to you."

By increasing the amount of moisture in the air during the winter, the wilting of plants indoors can be avoided.

Wife—"The maid has just given notice; she said that you spoke insultingly to her over the telephone, yesterday."

Husband—"Great Scott! I thought I was speaking to you."

By increasing the amount of moisture in the air during the winter, the wilting of plants indoors can be avoided.

Wife—"The maid has just given notice; she said that you spoke insultingly to her over the telephone, yesterday."

Husband—"Great Scott! I thought I was speaking to you."

Salaries of Aviator Postmen

In Addition to Regular Pay They Receive Mileage

The lure of flying holds its monetary reward, at least for the air mail pilot. The aviator postman receives an annual salary of between \$4,000 and \$9,000. The high pay, plus the desire for excitement, recently caused two field superintendents of the service to desert ground jobs and return to piloting. Both now fly on regular mail routes.

The mail pilot receives a base pay of between \$2,000 and \$3,600, depending on length of service, and is paid in addition by the mile for flying service. For daylight flying he receives a five-cent rate between Cleveland and Cheyenne, six cents between Cheyenne and Reno, and seven cents between New York and Cleveland and between Reno and San Francisco. For night flying the mileage scale is doubled.

The hazards of mail piloting are held by postal officials to justify the pay.

Children's Colds

Are best treated externally. Check them overnight without "coughing" by rubbing Vicks over throat and chest at bedtime.

VICKS
VAPORUB

ing such a commotion just now? Wilmore, John Wilmore, I think it is, sufficient importance for our esteemed journals to announce his arrival at Monte Carlo. Extraordinary compliment, what with so many dukes and their duchesses, right and left handed, arriving daily. Am I right Mademoiselle? Have I heard his name and yours together?"

Joanna answered quietly. "It is possible. You hear so much about names being linked together, down here." She smiled at him quizzically.

He laughed pleasantly. Prince Michael was always pleasant, this Russian who found nothing in his thirty-five years to make him otherwise except on such temporary occasions as when outwitted in some amorous adventure. It was a pleasantness, though, that impressed as a mask. The night before Joanna had known quite well there would have been no wedding formalities if she had found herself in Genoa with him.

"What else would you have?" he wanted to know. "We have no wars to fight and no work to do. There is nothing left but pastime. People used to write poems and read Shakespeare. Rotten time they had of it. Today we invent pleasures to be built upon by our senses. That's more reasonable and it involves a learned knowledge of who belongs to who and what's the chances of taking her away from him? But we were talking of this architect fellow. Tell me about him, please. Seems to enjoy working at something."

"You'll have to satisfy my own curiosity first," Joanna declared. "Perhaps you'll send for the 'esteemed journal.' I'd like to know what is being said of him. He was a very strutting student when I saw him last."

An attendant quickly produced a copy of L'Echo which bore the morning date. Michael pointed to a paragraph in the column of the new arrivals at the various resorts along the fashionable coast. Both Kentworth and Yvonne watched her intently when, with a murmur, "Pardon!" she fastened her eyes on the short item.

"Among the bookings on the Blue Express at Calais yesterday was the distinguished young American architect, John Wilmore, who comes from a visit to London for an indefinite stay. He has made reservations at the Ibis Palmiers. Mr. Wilmore's recent achievement of fame has been extremely interesting. It is understood that a year or so ago he was unknown. American capitals suddenly appreciated the great merits of his daring conception of a war memorial in which are included some startling conventional features which have caused international discussion among artists and scholars generally. It is believed his work will be a valuable contribution not only to America but to society and the world in general."

The paragraph explained the knowledge of the others that John was coming; that he had arrived, for the Blue Express came in with the morning. But did not explain why he had

that she knew of John's coming or arrival.

"Roddy turned up this morning after you had gone," she remarked, and was in a tearful fit. I gave him what consolation I could which didn't satisfy him. I suggested he join us for tea at the Hermitage. I am supposed to drop in there, on Michael. You will come along?"

Joanna agreed enthusiastically. "I must make some amends to Roddy," she observed. She didn't add that she was glad of the opportunity to settle the gossip over her and Michael by being seen, casually with him and Yvonne. She wanted to disabuse any notion that she had time for an affair with this Russian whose emotional amusements were never romantic. She preferred that he remained classified as belonging to the other woman.

When they crossed the lounge into the palm room, at the Hermitage, the smartly gowned women and debonair, idle men who gather from all parts of the world for this fashionable ten-hour exchanged furtive and curious glances. The two men were most discussed of the Riviera habitues, and the woman and the girl the season's brightest ornaments. For several weeks there had been rumors of some forthcoming event at Villa Amette. The Golden Girl, so the rumors ran, had wearied of such stereotyped thrills as spectacular plays at the roulette tables in the Casino, commonplace revels as were on the daily calendar among the Cap Martin villas—as Michael's for example. With her apparently endless supply of money and Yvonne's customary disregard of convention to support her, the news was, Mademoiselle Joanna was about to give the Riviera something actually worth while talking about. These echoes were vague, indefinite, but, it was observed, workmen already were mysteriously engaged on parts of the Villa Amette grounds.

"I have been approached by an act dozen of people," Roddy remarked when they had settled to their tea, "so far today with a request for inside information as to what's coming off at Amette. Monte Carlo is getting uneasy."

"And you've told what they expect to hear, haven't you?" Joanna asked lightly, "that it's to be just another wild extravagance of the mysterious American girl?"

"I've told them nothing," he returned. "It will be time enough when I am entrusted with a few invitations to extend. I may have some of my friends, may I not?"

"Yvonne is really the hostess, you know," Joanna informed him. "I'm only helping to pay the bills. I haven't spent anything for an age, now. It seems. I must have a real fling."

It was then that Prince Michael cut in and set Joanna's pulses to racing.

"I am reminded," he remarked. "Haven't I heard that Mademoiselle counted among her acquaintances at home this architect chap who is caus-

not notified her. Something about it all quivered at her lips, briefly.

"Extraordinary," Kentworth remarked when she put the paper aside, "how a man with nothing but a dream can suddenly stumble upon recognition and success. We all remember Wilmore in New York. If I remember, Miss Manners took occasion to be provoked with him."

"Then it was more than an acquaintance," Prince Michael declared. "One is never provoked with an acquaintance. We won't intrude upon that aspect, Mademoiselle," he added, to Joanna. "As you will probably present him, I'd like to know how he got on so well."

(To be Continued.)

Had Remarkable Cruise

Dutch Submarine Beats All Records for Non-convoyed Voyages

A wave of enthusiasm spread over this city when a report was received that the Dutch submarine K-13 had beaten all records for non-convoyed voyages by reaching Soerabaya after 196 days at sea.

The K-13 is a boat of 820 tons. It left the naval base at Nieuwpoort on May 27 for the Canary Islands.

After a voyage of 3,300 miles to Curacao, it proceeded to Panama and was the first foreign submarine to navigate the canal under its own power. From Panama the K-13 proceeded to Mazatlan, then to San Francisco and across the Pacific to Honolulu and Guam. It covered the 3,300 miles from Honolulu to Guam in nineteen days.

During the total of 20,000 miles covered in six and one-half months, the submarine used 396,000 liters of fuel oil and 7,500 liters of engine oil.

A MEDICINE THAT ALL MOTHERS PRAISE

Baby's Own Tablets Banish Babyhood and Childhood Ailments

Mrs. H. Oakes, Sarnia, Ont., says:

"I have used Baby's Own Tablets in my home for the past fifteen years and I believe the good health my children enjoy is due entirely to this medicine. The Tablets are helpful at teething time; relieve colds and are always beneficial in the minor ailments of little ones. I have recommended Baby's Own Tablets to other mothers whose experience with them has been as satisfactory as my own."

Baby's Own Tablets do one thing only, but they do it well. They act as a gentle laxative which thoroughly regulates the bowels and sweetens the stomach, thus banishing constipation and indigestion; colds and simple fevers and turn the cross, sickly baby into a well, happy, laughing baby.

Baby's Own Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

I trust in the mercy of God for ever and ever. —Psalm III, 8.

For us, whatever's undergone, Thou knowest, wildest what is done; Grief may be joy misunderstood, Only the good discern the good; I trust Thee while my days go on.

I praise Thee while my days go on; I love Thee while my days go on; Through dark and dearth, through fire frost,

With emptied arms and treasure lost, I thank Thee while my days go on.

—Elizabeth Barrett Browning.

It is the Lord, let Him do what seemeth good. Our part is to pray that we may bear patiently whatever trials may be allotted us, firmly trusting in His word that all things shall work together for good to them that love Him.

—Hannah More.

Sneezing?—Use Minard's Liniment.

Heroes Are Made

Because he had crawled out on thin ice and rescued a playmate who had broken through, little Willie was the centre of a group of admiring men and women.

"Tell us, my boy, how you were brave enough to risk your life to save your friend," said one of the ladies.

"I had to," was the breathless answer. "He had my skates on."

Easy Road—Good at start, but gets rougher'n a detour toward the home stretch.

Straight and Narrow Path—Full of holes, bumps and skiddy places at start but going gets easier towards the end.

For Colds—Minard's Liniment.

Listen!

Have you heard about Peps? Peps is a scientific preparation put up in pastille form, which provides an entirely new and effective treatment for coughs, colds, chest and throat troubles.

Peps contain certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapor, and are breathed down the air passages to the lungs. On their journey, they soothe the inflamed and irritated membranes of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the lungs.

While no liquid or solid can get to the lungs and air passages, these Peps fumes get there direct, and healing commences.

FREE TRIAL Cut out this article, write across it the name and date of this paper and mail it (with a stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps, 50c box.

Peps

Britain Reducing War Debt

Since June 1923, Has Paid \$642,830,000 to United States

Sir A. Maurice Low, Washington correspondent of a London daily newspaper, sent a dispatch to his newspaper in which he called attention to the fact that Great Britain already had paid \$642,830,000 to the United States in carrying out the agreement made in 1922 for the funding of the British wartime debt to the United States. He indicated also that inquiries made by him at the British Embassy had demonstrated that there was no intention on the part of his Government of asking to be excused from carrying out its obligations.

"Payments began in 1923, when on June 15, \$69,000,000 was paid on interest. On December 15, a similar amount was paid, and \$25,000,000 on principal. In 1924 two payments of \$65,550,000 each were made on interest, and \$23,000,000 on principal."

"In 1925, semi-annual payments for interest were \$48,310,000, and \$24,000,000 for principal. This year the interest payments have been, semi-annually, \$67,950,000, and the payment on principal has been \$25,000,000."

"Summed up to date, Great Britain has paid to the United States \$547,830,000 as interest, and the debt has been reduced by \$95,000,000."

Most men find it easier to take two steps backward than to take one forward.

A Man of Rare Professional Attainment

The originator of Dr. Pierce's Golden Medical Discovery was the late Ray V. Pierce, M.D. At first he practised medicine in Western Pennsylvania and his success were soon recognized there, then he moved to Buffalo, N.Y., and established the World's Dispensary where his famous home remedies have ever since been made.

Each succeeding year the sale of Dr. Pierce's Golden Medical Discovery has been greatly increased. Evidently people appreciate the fact that it increases the appetite, stimulates the digestion, helps to enrich the blood, clears the skin of eruptions and blemishes, and makes both men and women feel as they did when they were young. It contains no harmful ingredients.

Ask your nearest druggist for Doctor Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for a trial package of tablets to Dr. Pierce's branch laboratory in Bridgeburg, Ohio.

Make the
Pirate

For a wee man, he's a he-man
He's a dawg-gone happy,
slick and snappy. Bad, bad, sea-
man.

He's run many a schooner across the bar this pistolled, cut-
lassed, bold young tar, and with the ladies, or steamin' in Hades.
He's a wee man.

But a he-man

And most of all a sea-man.

Yo ho! Yo ho!

His missus don't know—

And so the word is mum, but
don't fail to see "Clothes Make the
Pirate," on Saturday night.

SALE OF FARM PROPERTY

Tenders will be received for the purchase of the N.E. 1/4 of Sec. 16-29-24 W. of the 4th Meridian, Alberta, until 12 o'clock noon on Saturday the 15th day of January, 1927.

Tenders must be made in a sealed envelope addressed to the Master in Chambers, Calgary, Alberta, and be accompanied by a marked cheque for five per cent of the amount of the tender. No tender for less than \$2100.00 will be considered, and no tender necessarily accepted.

The property will be sold subject to 1927 taxes, the balance of purchase price payable as follows: 20 per cent within sixty days in cash without interest, to be paid to Bennett, Hannah & Sanford, Barristers, Calgary, Alberta, the balance to be paid into court in three equal instalments, six months, twelve months and eighteen months from date of sale, carrying interest at eight per cent per annum.

The property is three miles from the Village of Grainger. 60 acres have been cultivated and the soil is a chocolate loam of good depth. Other improvements include a house 24x20, 1 1/2 storeys, log stable, shed 18x24, 1 storey and basement, also a shed 8x12 and old frame stable.

Further information may be obtained from Bennett, Hannah & Sanford, Lancaster Building, Calgary, Alberta.

Dated at Calgary, Alberta, this 18th day of December, 1926.
